6-3-23: Removal of the XCHRest API

We have removed the XCHRest API in favour of a docker-based REST-endpoint API. It will be released in the future. In the mean time, please use the Exchange API.

5-12-22: Job logs collapsible details

When you click on a line of the job logs, it no longer uncollapses a preview of the job logs. Instead, it just opens the job log files popup.
