Exchange xml test 3

System

The System sub-menu provides tools for system and application maintenance.

System status

Reporting page for the system status. All running YCE processes can be monitored and controlled from here. But also provides the means to update the software and install licences.

Main article: System status

Db archives

Form for managing the database backups.

Main article: Database management

Debugging

Page to control the debug mode of NetYCE and access the log files.

Main article: Debug logs

Exchange xml test

The testform for testing the NetYCE API.

Main article: Exchange XML test
