

Table of Contents

Regions 1

Regions

The regions form lets you manage your regions within defined client types to configure parameters specific for the region (for example a province, or a management region). The parameters can be defined in the [Parameters form](#) within the Design fase, under the Regions section.

Regions ✕

Client type	Region	Region description
AOC	AOC	AOC (default)
BAR	BAR	BAR (default)
BEL	BEL	BEL (default)
BN	East	Acme Far East
BN	Europe	Acme Europe
BN	West	Acme Americas
