NCCM

NCCM Overview

The generic NCCM guide detailing the setup, *Polling groups* and prerequisites.

Main article NCCM Overview

Syslog trigger

Next to periodical polls NCCM can also be triggered through syslog signals. This guide explains the different possibilities regarding syslog setups. Such as why we choose to wait for a certain period of time to retrieve a node's configuration after receiving a syslog message. It also explains how to configure the patterns to look for in these syslog messages to retrieve the node's configuration.
