

Change your support account password

If you forgot your support account password, you can change it yourself using [our password reset tool](#)

Enter your email address, tick the captcha checkbox and click the *Send* button to receive an email with the password reset link.

It might take 1 minute for the email to arrive.

Please take notice of our password policy when entering your new password, tick the captcha checkbox and click the *Send* button

This message will be displayed when the new password doesn't comply with our password policy.

Password has been changed successfully.
