Download Sublime NetYCE syntax

For those who spent a lot of time in templates and scenarios a more advanced editor might be useful. Because of this a syntax highlighter has been created for Sublime Text 3. It highlights the possibilities in templates and well as scenarios and there specific commands.

An example of a template and scenario is shown below:

```
# template example
#reload ipv4_port
| ! <Qos_profile>|[Error(No Qos_profile provided)]

|<special12> = 'ASR920-12CZ-A'|interface Te0/0/13
|!|interface Te0/0/5
  description Uplink to <hostname> / <remote_interface>
  mtu 9216
  vlan <Vlan_id@Vlans>
!

# Scenario example
cmd_exec -n <node> -f <node>.cmd -x -t <<EOT
Some specific configuration
EOT

cmd_exec -n <node> -f <node>.cmd -x -t <<EOT
router bgp 65222
 bgp router-id <Ip_parameter@Management_port:'Ma0'>
 no bgp default ipv4-unicast
 bgp log-neighbor-changes
 !
 address-family ipv4
  no auto-summary
!
EOT
```

Download

You can use packagecontrol.io to install the syntax highlighter for NetYCE and it will keep it up to date.

Alternatively, you can download from this repository and place the syntax file in the `Packages/User` folder and will it be loaded automatically.

- Windows location: `Users/<user>/appdata/roaming/sublime text 3/packages/user`
- Linux location: `/home/<user>/.config/sublime-text-3/Packages/User`
- Mac location: `/Users/<user>/Library/Application Support/Sublime Text 3/Packages/User`

If you've noticed an glitch, please let us know and we'll make sure you'll get an update.
