General settings

Access the Lookup table to modify several categories of system settings and options. These are categorised using different classes:

Class	Example
Defaults	Default_enable_secret
Internal	Version of SQL database
ML3_service_type_migration	Contains translations of servicetypes for the use in a migration
NodeType	Translations for nodetypes
Password	Configurable rules to create a password policy
Migration	Migrationphases
Profiles	Site and Node profile definitions
Translation	Client status translation
Tweaks	Option to modify a production template
Vendors	Per vendor the type, comment-string and cr-lf behaviour

For more information on which tweaks mean what, please refer to the For more information, refer to the Settings Tweaks
