# Setup

The setup menu is used to handle lookup settings and system configurations. There are two pages:

## General Settings

*Main article: General Settings*

Manage setting and system values that are used through the application

## Compliance Settings

*Main article: Compliance Settings*

Manage Compliance setting and tuning variables for the Backups and Compliance processes.

## Configuration files

*Main article: Configuration files*

This tool allows you to edit the NetYCE system configuration files.
