2025/12/12 06:59 1/2 Users

Users

From the users form the user management can be done.

Last update: 2024/07/03 12:31

Add user

To add a user, just click the + and enter the user id. The user id can be changed at a later time when needed.

Delete user

By selecting the user and clicking the \boxtimes button. Conformation will be asked before a user is actually deleted.

Find user

It's possible to search for a user by using the \boxtimes button and entering the user id. It isn't possible to search for a user by name.

Manage user

When selecting a user, the details of that user will be displayed. These variables can be set and stored by using the **[Apply]** button.

Permission levels

The permission settings will be updated as soon as the group id is set.

Password management

The password can be set by entering the password and clicking the **[Set password]** button. The new password can also be expired by using the *Expire* checkbox.

The maximum age of the password can be set in the Max age field. This value is in days. A value of 0, sets no limit.
