

bop_error conf

While processing BOP service orders, NetYCE sends status and error codes back to BOP, depending on its process. In the configuration file `/opt/yce/etc/bop_error.json` these error codes can be modified. It consists out of a key, followed by the http code that it should return, and the bop code. In the table below, you can find the keys for the messages that you are able to send:

Key	Http code	Bop code	Explanation
notify_no_module	500	0101	
notify_bad_request	400	0102	
create_no_module	500	1002	
create_bad_request	400	1002	
create_decode_error	500	1003	
create_conflict	409	1100	
create_failed	400	1100	
create_missing	200	1200	
list_no_module	500	2001	
get_no_module	500	3001	
get_no_id	400	3002	
renew_no_module	500	4001	
renew_no_id	400	4002	
renew_bad_request	400	4003	
renew_decode_error	400	4004	
renew_not_found	400	4100	
renew_wrong_state	409	4100	
renew_conflict	409	4100	
renew_failed	400	4100	
renew_missing	201	4200	
update_no_module	500	5001	
update_no_id	400	5002	
update_bad_request	400	5003	
update_decode_error	400	5004	
update_not_found	400	5100	
update_wrong_state	409	5100	
update_failed	400	5100	
update_missing	201	5200	
drop_no_module	500	6001	
drop_no_id	400	6002	
drop_not_found	400	6100	
drop_wrong_state	409	6100	
cancel_no_module	500	7001	
cancel_bad_request	400	7002	
cancel_decode_error	400	7003	
submit_no_id	400	7100	
submit_not_found	404	7100	
submit_wrong_state	409	7100	

notify_create_no_module	500	8001
notify_list_no_module	500	8001
notify_create_bad_request	400	8002
notify_no_callback	400	8100
notify_bad_callback	400	8100
notify_drop_no_module	500	8001
notify_drop_no_id	400	8001
notify_unregister_no_id	400	9100
update_order_state_not_found	400	9500
update_order_state_wrong_state	409	9500
update_order_state_wrong_attribute	400	9500
update_item_state_not_found	400	9500
update_item_state_wrong_state	409	9500
update_item_state_wrong_attribute	400	9500
update_order_no_module	500	9501
update_item_no_module	500	9501
update_order_no_id	400	9502
update_item_no_id	400	9502
update_order_bad_request	400	9503
update_item_bad_request	400	9503
update_order_decode_error	400	9504
update_item_decode_error	400	9504
